

## CDYNE POSTAL ADDRESS VERIFICATION 3.0

CDYNE is proud to announce the release of Postal Address Verification 3.0. The new version offers a more robust API, competitive pricing, and versatile features.

As an incentive to upgrade to the new service for our current API subscribers, CDYNE is offering the following **improved pricing** for Postal Address Verification 3.0:

|                               | Postal Address Verification (Deprecated) | Postal Address Verification 3.0 |
|-------------------------------|--|---------------------------------|
| Monthly Licensing Fee         | \$34.99                                  | \$9.99                          |
| ZERO to 1,000 trans/mo        | 3.5 cents per transaction                | 3 cents                         |
| 1,001 to 3,000 trans/mo       | 3 cents                                  | 2.5 cents                       |
| 3,001 to 10,000 trans/mo      | 2.5 cents                                | 1.8 cents                       |
| 10,001 to 50,000 trans/mo     | 1.8 cents                                | 1.2 cents                       |
| 50,001 to 100,000 trans/mo    | 1.1 cents                                | 0.8 cents                       |
| 101,001 to 500,000 trans/mo   | 0.8 cents                                | 0.6 cents                       |
| 500,001 to UNLIMITED trans/mo | 0.5 cents                                | 0.4 cents                       |

Listed below are the most requested **new features** added to Version 3.0.

### POSTAL ADDRESS VERIFICATION 3.0 FEATURES

- ✓ **Integrates** with your website, database, or system using SOAP (Simple Object Access Protocol) or REST (Representational State Transfer) protocols
- ✓ Supports JSON notation
- ✓ Comprehensive **DPV return code system** that confirms the existence of a specific address (down to the apartment or suite number) and the fact that it can be delivered to
- ✓ Avoid residential delivery surcharges by verifying delivery type status prior to shipping with **Residential Delivery Indicator (RDI)**
- ✓ Qualify for additional USPS discounts with **Intelligent Mail Barcode (IMB)**
- ✓ Optional data return includes
  - Proper case formatting
  - Census data – CMSA, FIPS, Census block and Census tract number
  - Geo location data – latitude/longitude, area code, time zone, and daylight savings
  - Legislative data - Congressional district number and State Legislative Upper/Lower
- ✓ Checks for **Puerto Rican Urbanization** to distinguish similar addresses in the same zip code
